Engine Fan Runs with Key Off

18MY - onward Range Rover, RR Sport, Defender, RR Evoque, Discovery Sport, XE, XF, F TYPE, F PACE, E PACE equipped with AJ20P4

Customer Voice:

- The engine fan will run sometimes after the engine is shut off.

Technical Description:

- After-run of the engine cooling fan is normal for 30-60 seconds after an extended drive , operating in high ambient temperatures, or operating under high loads.

Status:

- This may be noted by some customers as an intermittent complaint and is considered normal operation.
- Do not replace parts unless DTCs are present and diagnosis of the DTCs identifies the hardware is the cause.
