The airbag Supplemental Restraint System (SRS) is a supplement to the safety belts and is designed to work as a system with the safety belts. Although airbags provide additional protection, airbags without safety belts do not provide optimal protection in a crash. Always wear your safety belts. Children younger than 13 years old should always be properly restrained in a back seat, away from airbags. Never place an infant seat in the front seat.

For instance, when fitted with 22" wheels and tires, estimated EPA range would be 217 miles.

11. Please note that if any action is taken, even minimal steering, the Emergency Braking/High-speed Emergency Braking system will assume the driver resumed control of the vehicle and the system will automatically disengage.

12. Federal tax credit ranges from \$0 to \$7,500. Excludes tax, title, license and retailer fees. Actual savings from the federal government depend on your tax situation.
