

INFORMATION AND ENTERTAINMENT SYSTEM - GENERAL INFORMATION

INCONTROL TOUCH SD MEMORY CARD ACTIVATION (G2009339)

GENERAL PROCEDURES

ACTIVATION

NOTE:

If required, a data storage device will require activating and then inserted into the vehicle.

1.

Make sure that the Jaguar Land Rover approved diagnostic equipment is connected to the network and the vehicle.

2.

If required, switch the ignition ON.

3.

Remove the correct data storage device for the vehicle from its packaging.

4.

Navigate to the 'InControl Touch SD Card Activation' application in Service Functions.

5.

Insert the data storage device into the Jaguar Land Rover approved diagnostic equipment data storage device slot.

6.

Follow the on-screen instructions to confirm the data storage device is in the Jaguar Land Rover approved diagnostic equipment and to proceed with the activation of the card.

7.

- When the map activation process is complete, one of the following screens will be displayed:
- Activation successful "Map License Activated, Software Level Correct" – proceed to Step 8.
- Activation successful "Map License Activated, Unable to Confirm Software Level". Continue to follow the on-screen instructions.
- Activation unsuccessful and error information will be displayed. Continue to follow the on-screen instructions.

8.

 NOTE:

Make sure that the data storage device is inserted into the vehicle's navigation data storage device slot before selecting the tick to continue with the PDI application on the Jaguar Land Rover approved diagnostic equipment.

Remove the data storage device from the Jaguar Land Rover approved diagnostic equipment, then insert the data storage device into the navigation data storage device slot in the vehicle.

9.

The navigation system will automatically restart after confirming the data storage device is inserted in the vehicle correctly and the tick is selected.

10.

 NOTES:

- Make sure the vehicle has sufficient Global Positioning System (GPS) signal; it may be necessary to move the vehicle to an area of good signal coverage.
- Once the SD memory card has been activated, it will only operate in the vehicle with the matching VIN.

Once the infotainment system has restarted, enter navigation and check for operation.
