

ELECTRIC SEATS

E149505

⚠ Do not adjust the seat while the vehicle is moving. Doing so could cause a loss of vehicle control and personal injury.

1. Seatback angle adjustment.
2. Lumbar support adjustment.
3. Forward and rearward adjustment.
4. Cushion front tilt adjustment.
5. Height adjustment.

6. Bolster adjustment (inflate/deflate).

To adjust the seats, the Smart key must be in the vehicle and the ignition turned on.

If an obstruction is encountered while the seat is in motion, the seat will stop moving and further movement will be restricted until reset.

To reset the seat:

1. Remove the obstruction.

Front seats

2. Adjust the seat to the point where movement is restricted.
3. Press and hold the switch for at least 2 seconds to override the restriction.

MANUAL SEATS

E149589

⚠ Do not adjust the seat while the vehicle is moving. Doing so could cause a loss of vehicle control and personal injury.

1. Seatback angle adjustment.
2. Height adjustment.
3. Forward and rearward adjustment.

DRIVING POSITION MEMORY

E149609

1. Memory set button.
2. Memory preset buttons.

Once you have adjusted the driver's seat, steering column (**23, ADJUSTING THE STEERING WHEEL**), and exterior mirrors (**50, EXTERIOR MIRRORS**) the vehicle can memorise these settings using the driver memory buttons.

Once the passenger seat has been adjusted, these settings can be memorised using the passenger memory buttons.

To memorise a setting:

1. Press the memory set button to activate the memory function.
2. Press one of the preset buttons within 5 seconds to memorise the current settings. For the driver's settings, a confirmation will be displayed on the Message centre; accompanied by an audible chime to confirm the settings have been memorised.

Front seats

A seat position can only be memorised during the 5 second period.

Any existing settings for a memory preset will be overwritten when programming a memory position.

RECALLING A MEMORISED POSITION

Press the appropriate memory preset button (for the driver's settings, a confirmation will be displayed in the Message centre).

RESTRICTED SEAT TRAVEL

If an obstruction is encountered while the seat is in motion, the seat will stop moving and further movement will be restricted until reset.

To reset the seat:

1. Remove the obstruction.
2. Adjust the seat to the point where movement is restricted.
3. Press and hold the switch for at least 2 seconds to override the restriction.

SITTING IN THE CORRECT POSITION

The seat (with its integrated head restraint), seat belt, and airbags, all contribute to the protection of the user. Correct use of these components will give you greater protection, therefore, you should observe the following points:

1. Sit in an upright position with the base of your spine as far back as possible. To achieve optimum benefit of the seat belt in the event of an accident, do not recline the seat excessively.
2. Do not move the driver's seat too close to the steering wheel. Ideally, a minimum distance of 254 mm (10 inches) is recommended between the breastbone and the steering wheel airbag cover. Hold the steering wheel in the correct position with your arms slightly bent.
3. Position the seat belt so that it is midway between your neck and your shoulder. Fit the strap tightly across your hips; not across your stomach.

Make sure that your driving position is comfortable and enables you to maintain full control of the vehicle.

Do not adjust the seat while the vehicle is moving.
